

Algeria → Hungary Student Pathway

Business Strategy, Competitive Analysis & Master To-Do List

Version: 1.3

Date: July 2026

Status: Foundation document — branding, website, and marketing build on this next.

Verified Facts vs. Planning Assumptions

Rule: This document must not contain invented numbers. Only use figures **confirmed by founders** or **cited from a public source**.

Confirmed by founders / direct conversation

Fact	Source
Yacine + you co-found one new company	Founders
Yacine leaves the old agency he promoted for; promotes your company going forward	Founders
~ 100 students per semester facilitated through Yacine's pipeline	Yacine (partner message)
~ 1 million social media followers (Yacine)	Founder correction
Yacine's name is the brand students recognize	Founders
You are the Higher Education Consultant — university side	Founders
Target market: Algerian students → Hungary (Budapest)	Founders
Post-2022 growth in Algerian interest in Budapest	Yacine (partner message)
Full process: office → registration → acceptance → visa → arrival	Yacine (partner message)

Competitor section (Section 3)

Observations about **Study in Hungary**, **Hungary Education Gateway**, **Student Guide Hungary**, **Studies in Hungary**, and **HunEducation** are based on their **public websites** at the time of writing — not on internal data. Treat as market research, not verified facts about your business.

Planning assumptions (not facts — adjust as you go)

- Phase timelines (Week 1–2, etc.) — suggested pacing only
- Year 1 metric targets in Section 8 — **placeholders until founders set real targets**
- “Start with 2–3 universities” — strategic recommendation, not a confirmed decision

- Commission payment timelines — industry pattern (e.g. PTE guide); confirm per university contract
-

1. Executive Summary

You and Yacine Mouloudi are co-founding one new company together. This is not a partnership between two separate businesses — it is a single venture with two founders who bring complementary skills.

Co-founder	Primary strength	Typical focus
Yacine Mouloudi	Audience, trust, marketing, Algeria-side student ops	Content, office, local paperwork, community
You (HE Consultant)	University access, admissions expertise, Hungary-side knowledge	Professor meetings, agent agreements, process design

Origin of the idea: Yacine previously promoted for an **existing agency**. He built that pipeline — the audience, the trust, the ~100 students per semester. He is leaving to co-found **your company** with you. From launch, he promotes **your brand, for both of you** — not the old agency.

Yacine's track record = your company's credibility. These are his merits, and they come with the new venture:

- ~100 students facilitated per semester (*confirmed — Yacine*)
- ~1M social media followers (*confirmed — founders*)
- Post-2022 growth in Algerian demand for Budapest (*confirmed — Yacine message*)
- Proven end-to-end process: office → registration → acceptance → visa → arrival
- Algerian student community already in Budapest

For students, Yacine's name is the brand. They know him, trust him, and will follow him to your company. The legal company name and website sit behind that — but **Yacine is the concept students recognize**.

The old agency loses Yacine as its promoter and likely becomes a competitor — but **you keep everything he built** in terms of reputation, numbers, and audience.

Revenue model (typical industry):

- University commission per enrolled student (after refund deadline)
- Optional consulting/service fee paid by student (must be transparent)
- **Not** paid intermediation for Stipendium Hungaricum (official scholarship — free, government-managed)

One-line mission:

Guide Algerian students from first curiosity to enrolled student in Hungary — with clarity, community, and zero confusion about costs or paths.

2. Business Model (How It Works)

Algerian student sees Yacine content

Free online orientation (webinar / video series)

Decision: "I want Hungary"

Paid or structured consultation → university + program match

Document checklist → application → acceptance

Visa / residence permit support

Arrival in Budapest → registration + settling in

Two student paths (keep separate in all communication)

Path	Who runs it	Our role
Stipendium Hungaricum (government scholarship)	Tempus Public Foundation + Algerian sending partner	Free guidance only — explain official steps, link to official portal, never charge for application
Self-funded / university contract	Our consultancy + partner universities	Full service — consultation, application, visa, arrival

Critical rule: Never mix these paths in marketing. Charging for scholarship applications damages trust and may violate program rules.

2.1 Founding Structure — What This Changes

One company, two founders

- Single legal company, single website, single student journey
- Founders' agreement covers equity, roles, revenue, and exit rules
- **Yacine = public face and student-facing brand; you = Hungary-side expert and university partnerships** — both are co-owners
- Yacine promotes **your joint company** on his channels — same audience, new destination (your brand)

What comes with Yacine (your marketing & ops assets)

These stay. They are **his achievements** and **your company's strengths from day one**:

Asset	Why it stays
~100 students / semester track record	Confirmed — Yacine's pipeline result

Asset	Why it stays
~1M social audience	Confirmed — founders
Student trust & community in Budapest	Built on Yacine's name and story
Proven process (office → visa)	Operational know-how Yacine brings as co-founder
Content formula that converts	Same creator, now pointing to your company

What needs fresh setup (legal/admin only)

These are paperwork, not credibility — handle in Phase 0, but don't undersell yourselves while doing it:

Admin task	Notes
University agent agreements	Sign in your new company's legal name
Commission tracker codes	Register fresh with each university
Legal entity (Hungary / Algeria)	Company registration, invoicing structure
Transition announcement	"Same Yacine, our company now" — clarity for students

Transition risks (Phase 0 priority)

1. **Non-compete / exclusivity** — Confirm Yacine can promote your Hungary service before public launch.
2. **University contracts** — Re-sign agent deals under your company name (Yacine's volume story helps negotiate).
3. **Clear handoff message** — Students should know: *same Yacine, same quality, now our own company — even better.*
4. **Social content switch** — Announcement video: Yacine now promotes **your** company exclusively.
5. **In-flight students** — Decide policy for cases still with old agency (finish there vs. migrate).

How to talk about the transition publicly

- **Do:** Lead with Yacine's track record (~100 students/semester, trusted name).
 - **Do:** "We built our own company to serve you better — more universities, full transparency."
 - **Do:** Make Yacine's name visible everywhere students look (social, website hero, testimonials).
 - **Don't:** Attack the old agency by name (legal risk).
 - **Don't:** Downplay Yacine's past results — they are **your** proof points now.
-

3. Competitive Landscape

*All competitor notes below are from **public websites** (market research). Not verified internal data.*

3.1 Official reference — Study in Hungary / Stipendium Hungaricum

What they are: Government program (Ministry of Foreign Affairs, Tempus Public Foundation).
Not a competitor — the **authority**.

What they do well:

- Strong country brand: "Crossroads of Europe"
- 90+ sending partners, 600+ programs, credible scholarship story
- Free online application system (DreamApply)
- Clear warning: *"Do not apply through unknown agencies"*

What we learn:

- Use Hungary's official credibility in our content (facts, links)
- Never position ourselves as the scholarship provider
- Our value = navigation + support for paths that **are** allowed to use agents

What we must NOT copy:

- Claiming official status we don't have
 - Charging for Stipendium applications
-

3.2 Hungary Education Gateway (Ghana / UK model)

Website: hungaryeducationgateway.com

What they do well:

- Clean, simple value proposition: Quality / Experience / Cost / Career
- Regional focus (West Africa) — speaks to one audience
- Physical office + contact form + WhatsApp culture
- University partner logos for credibility

What they do poorly / gaps:

- Generic copy — could be any country
- No community or influencer layer
- No visible student journey map (step-by-step)
- Limited social proof (few testimonials visible)

What we do differently:

- Algeria-specific content (Arabic + French + English)

- Influencer trust layer they cannot replicate
 - Show real student stories from Algerian community in Budapest
-

3.3 Student Guide Hungary (Budapest-based)

Website: sghungary.com

What they do well:

- Strong tagline: "**Study in Hungary. Simplified**"
- Clear service blocks: University Selection → Application → Visa
- Niche focus: Medical entrance exam prep (smart specialization)
- WhatsApp-first contact (matches Algerian student behavior)
- Budapest address = local trust

What they do poorly / gaps:

- Website feels incomplete / truncated
- No origin-country office story
- Generic international positioning, not country-specific
- No content marketing funnel visible

What we do differently:

- Founder-led: influencer + HE consultant in **one** company (not outsourced marketing)
 - Algeria office + Hungary expertise under **one brand**
 - Community-first, not just "simplified paperwork"
-

3.4 Studies in Hungary / Studeo Hungaria

Website: studiesinhungary.com

What they do well:

- Broad service stack: admission, immigration, housing, job assistance
- Course catalog by field (Medicine, IT, Business, etc.)
- B2B agent network (India, UK offices) — commission model documented
- "Call for Partners" page — recruits sub-agents
- Hungarian company positioning: "We represent local universities"

What they do poorly / gaps:

- Typos and duplicate content hurt professionalism

- Overloaded service list — hard to know where to start
- Feels like a directory, not a guided journey
- No strong brand personality

What we do differently:

- Fewer services on day one, executed excellently
 - One clear funnel: Orient → Consult → Apply → Arrive
 - Premium brand feel (influencer + consultant credibility)
-

3.5 HunEducation (long-established Hungary agency)

What they do well:

- 24+ years experience — deep trust signal
- Positions as "official application center" for partner universities
- Detailed arrival services (airport pickup, bank account, SIM, orientation)
- Multi-language site

What they do poorly / gaps:

- Old-school web presence
- Turkey-focused historically; not Algeria-specific
- Service list is long — overwhelming for first-time student

What we learn:

- Arrival support is a **retention and referral driver** — don't skip it
 - "Complete package" sells, but must be phased (see Section 5)
-

3.6 The old agency Yacine promoted for (what we leave behind)

What Yacine built there — now yours to claim:

- The ~100 students/semester result
- The influencer-driven acquisition model
- Algeria office workflow and student support process
- Trust of Algerian students who follow Yacine

What changes: Yacine stops promoting them. He promotes **your company** exclusively. His name, audience, and track record move with him.

The old agency likely becomes a competitor without its main channel — but **you are not starting from zero**. You start with Yacine's full merit and momentum; you add your university access and a

company you own together.

4. What We Might Be Getting Wrong or Overdoing

Risk	Why it's a problem	What to do instead
Too many universities too fast	Hard to support quality; weak commission deals	Start with 2–3 partner universities, nail the process, then expand
Copying generic "Study in Hungary" copy	Sounds like every other agency	Lead with Algerian student stories, Budapest life, Yacine's journey
Offering Stipendium as a paid service	Illegal feel, destroys trust, official program warns against it	Free info only; monetize self-funded path
Building Hungary office before Algeria funnel works	Ops cost without volume	Lean ops first: Yacine handles Algeria-side; you handle university side
Forgetting to re-sign university agent deals	No commission legally	Register tracker codes under your company name — Yacine's volume helps the pitch
Launching before Yacine's exit is clean	Non-compete lawsuit, brand clash	Phase 0: legal clearance + transition announcement plan
Overpromising visa success	Visas depend on embassy, documents, student profile	Clear disclaimers; document checklist as product
Website before offer is clear	Beautiful site, confused customer	Define packages, pricing logic, and 2–3 programs first
Ignoring French & Arabic	Most Algerian students search in FR/AR, not EN	Trilingual content from day one (EN for universities, FR/AR for students)
Skipping founders' agreement	Equity fights, exit chaos	Written co-founder agreement: equity, roles, vesting, decision rights
Treating Yacine as "marketing only"	He built the demand — he must be co-owner in story and ops	Both founders on About page; shared decision on pricing and brand
Two brands at launch	Students don't know who to trust	One company, one name, one website — period

5. Our Differentiation Strategy

What we are

The **Algeria-to-Hungary student pathway** — community-led, consultant-backed, step-by-step.

What we are NOT

- A generic "study abroad" agency for all countries
- An official government program
- A visa factory that disappears after acceptance

Our 5 unfair advantages

1. **Yacine's name = the brand students know** — ~1M audience and ~100 students/semester track record, now promoting **your** company
2. **Founder duo** — influencer trust + HE consultant credibility in one company
3. **Proven pipeline from day one** — not a startup guessing; a working machine with a new owner
4. **Your university access** — more doors, better terms, professor-level partnerships
5. **Algerian community in Budapest** — social proof, referrals, arrival support network

Positioning statement (draft)

Yacine facilitated ~100 Algerian students to Budapest every semester. Now he's building something of his own — with expert university partnerships — to serve you even better.

6. Phased Master To-Do List

Use this as the single followable roadmap. Check items in order within each phase before jumping ahead.

PHASE 0 — Foundation (Week 1–2)

Co-founder alignment, clean exit from old company, legal clarity — before any public launch.

- ☐ **0.1** Co-founder session (you + Yacine): vision, equity split, roles, decision rights, what "success" means in Year 1
- ☐ **0.2** Map Yacine's exit from old company: contract end date, non-compete clause, can he name Hungary/students publicly?
- ☐ **0.3** Draft **co-founder agreement** (not vendor contract): equity, vesting, roles, IP, brand ownership, exit rules

- ☐ **0.3b** Plan transition announcement: video/script for Yacine's channels — "new company, why now, what's better"
 - ☐ **0.3c** Decide policy for in-flight students still with old company (finish there vs. migrate)
 - ☐ **0.3d** Define legal entity structure: Hungary company, Algeria presence, who invoices students, who signs university agent agreements
 - ☐ **0.4** Choose primary monetization: university commission only vs commission + student service fee (document both)
 - ☐ **0.5** Map two paths explicitly: Stipendium (free guidance) vs self-funded (full service)
 - ☐ **0.6** List 5–10 target universities; prioritize 2–3 for first semester launch
 - ☐ **0.7** Schedule professor/university meetings — prepare one-pager: volume (~100/semester), student profile, terms needed
 - ☐ **0.8** Confirm university agent registration process (tracker codes, commission timeline — confirm per university contract)
 - ☐ **0.9** Document the **old company's process** end-to-end (office → acceptance → visa) — copy what worked, fix what didn't
 - ☐ **0.10** Set success metrics for Year 1: students enrolled, revenue, acceptance rate, visa rate, NPS/referrals
-

PHASE 1 — Offer & Operations (Week 2–4)

Define exactly what we sell and how we deliver it.

- ☐ **1.1** Name the service packages (e.g. Orientation / Application Support / Full Journey)
- ☐ **1.2** Write pricing logic (even if not public yet): what is free, what is paid, what universities pay
- ☐ **1.3** Build master document checklist by program type (Bachelor / Master / Medicine if applicable)
- ☐ **1.4** Create application timeline calendar (semester intakes, deadlines, visa processing time)
- ☐ **1.5** Design online orientation content outline (5–7 modules: Why Hungary, Costs, Programs, Visa overview, Life in Budapest, Next steps)
- ☐ **1.6** Set up CRM or simple tracker (Notion / Airtable / Google Sheet): lead → oriented → consulting → applied → accepted → visa → arrived
- ☐ **1.7** Define WhatsApp / email response SLA (e.g. reply within 24h)
- ☐ **1.8** Assign roles: who handles Algeria office, who handles university liaison, who handles visa docs review
- ☐ **1.9** Create FAQ doc: top 20 Algerian student questions (costs, Arabic/French speakers, work while studying, etc.)

- ☐ **1.10** Legal review: terms of service, privacy policy, refund policy for paid services
-

PHASE 2 — Branding (Week 3–5)

One clear identity before website build.

- ☐ **2.1** Choose company legal name + decide how Yacine's name appears (hero brand: his name is what students know; company name supports it)
 - ☐ **2.2** Write tagline (max 8 words) — test with 5 Algerian students
 - ☐ **2.3** Define brand voice: friendly, honest, expert — not salesy or government-official
 - ☐ **2.4** Founder presentation: Yacine front and center (face, name, stats); you as Hungary expert co-founder on About page
 - ☐ **2.5** Design logo + color palette (trust colors: blue/green + warm accent; avoid generic grad-cap clipart)
 - ☐ **2.6** Create basic brand kit: logo files, fonts, colors, social templates
 - ☐ **2.7** Write boilerplate "About us" in EN, FR, AR (3 versions, same facts)
 - ☐ **2.8** Collect 3–5 student testimonials (photo + name + program + quote) — even short video clips
 - ☐ **2.9** Photography plan: Budapest campus, office in Algeria, Yacine authentic content (not stock photos)
 - ☐ **2.10** Register social handles: Instagram, TikTok, Facebook, YouTube — consistent username
-

PHASE 3 — Website (Week 5–8)

Simple, trust-building, mobile-first.

- ☐ **3.1** Choose platform (recommended: simple static site or Webflow/Framer — fast, professional, easy to update)
- ☐ **3.2** Site map (max 7 pages):
 - Home
 - How It Works (step-by-step journey)
 - Programs / Universities
 - Orientation (free resource / webinar signup)
 - About (you + Yacine + mission)
 - FAQ
 - Contact (WhatsApp button prominent)
- ☐ **3.3** Homepage must answer in 10 seconds: Yacine's name + track record → what we do

→ why trust us → WhatsApp / next step

- ☐ **3.4** Build "How It Works" as visual timeline (Orient → Consult → Apply → Visa → Arrive)
 - ☐ **3.5** Add Stipendium section: official links only, clear "free government program" label
 - ☐ **3.6** Add university partner section (logos only after signed agreements)
 - ☐ **3.7** Embed orientation signup form (name, email, phone, WhatsApp, program interest)
 - ☐ **3.8** Mobile optimization + WhatsApp click-to-chat
 - ☐ **3.9** FR and AR key pages (minimum: Home, How It Works, Contact)
 - ☐ **3.10** Analytics: Google Analytics or Plausible + Meta Pixel for ad retargeting later
 - ☐ **3.11** Launch soft beta — share with 10 students for feedback before public push
-

PHASE 4 — Marketing & Funnel (Week 6–12, ongoing)

Drive leads into orientation, then consultation.

- ☐ **4.1** Record Orientation Module 1 with Yacine: "Why Budapest changed my life" (15–20 min)
 - ☐ **4.2** Create lead magnet: "Algeria → Hungary Document Checklist PDF" (email/WhatsApp capture)
 - ☐ **4.3** Weekly content calendar: 3 posts/week (1 Yacine personal, 1 educational, 1 student story)
 - ☐ **4.4** Monthly live Q&A on Instagram/TikTok Live (Yacine + you or consultant)
 - ☐ **4.5** WhatsApp broadcast list or community group (rules + moderation plan)
 - ☐ **4.6** Referral program: enrolled students refer friends (simple reward — consultation discount or arrival help)
 - ☐ **4.7** Partner with 1–2 Algerian universities for Stipendium info sessions (credibility, not sales)
 - ☐ **4.8** Track funnel metrics weekly: views → leads → orientations → consultations → applications
 - ☐ **4.9** Retarget website visitors with testimonial ads (Month 2+)
 - ☐ **4.10** Avoid: fake urgency, hidden fees, guaranteed visa language
-

PHASE 5 — University Partnerships (Week 4–16, parallel)

Expand supply side with clear commercial terms.

- ☐ **5.1** Prepare university pitch deck: audience size, student profile, volume forecast, support we provide

- ☐ 5.2 Meet first target university — agree: programs, fees, admission requirements, agent commission
 - ☐ 5.3 Sign agent/cooperation agreement; register tracker codes in application portal
 - ☐ 5.4 Document per-university requirements in internal playbook
 - ☐ 5.5 Repeat for universities 2 and 3
 - ☐ 5.6 Negotiate: batch acceptance support, dedicated contact person, fast document turnaround
 - ☐ 5.7 Quarterly review with each partner: enrollment numbers, issues, commission payments
 - ☐ 5.8 Only add university #4+ when ops team confirms capacity
-

PHASE 6 — Delivery Excellence (Ongoing from first student)

Retention and referrals depend on this.

- ☐ 6.1 Every student gets a named contact + shared checklist with deadlines
 - ☐ 6.2 Pre-application review: documents checked before submission (reduce rejections)
 - ☐ 6.3 Acceptance → visa handoff document (step-by-step, embassy-specific for Algeria)
 - ☐ 6.4 Pre-departure briefing (online): what to pack, money, housing, first week in Budapest
 - ☐ 6.5 Optional arrival package (phase 2 revenue): airport pickup, SIM, bank, dorm help — learn from HunEducation
 - ☐ 6.6 30-day check-in after arrival: problems, referrals, testimonial request
 - ☐ 6.7 Alumni community: connect new students with Algerians already in Budapest
 - ☐ 6.8 Collect outcome data: accepted / visa granted / enrolled / dropped — improve weak steps
-

PHASE 7 — Scale & Protect (Month 6+)

Grow without breaking trust or quality.

- ☐ 7.1 Hire or train 1 dedicated application coordinator (when >30 active applicants)
- ☐ 7.2 Standardize internal playbooks so quality doesn't depend on one person
- ☐ 7.3 Explore sub-agent model (like Studies in Hungary) only if ops are stable
- ☐ 7.4 Add programs based on demand data, not guesswork
- ☐ 7.5 Annual brand trust audit: reviews, complaints, refund rate, university partner satisfaction
- ☐ 7.6 Consider Stipendium info partnership (official info sessions) — brand lift without charging

- ☐ 7.7 Evaluate second origin market only after Algeria flywheel is self-sustaining
-

7. Website & Marketing — Do / Don't Quick Reference

DO

- Show the step-by-step journey visually
- Use Yacine's real story and face
- Be explicit about costs (tuition, living, service fees)
- WhatsApp as primary CTA
- Separate scholarship vs self-funded paths
- Show Algerian students already in Budapest
- Link to official Study in Hungary / Stipendium pages

DON'T

- Promise guaranteed admission or visa
 - Use stock photos of random students
 - Copy competitor text word-for-word
 - List 20 universities before signing 3
 - Charge for Stipendium application support
 - Launch in English only
 - Hide who you are (no faces, no address, no contact)
-

8. Key Metrics Dashboard (Track Monthly)

Set these targets together in Phase 0.10 — do not use placeholder numbers in external marketing until confirmed.

Metric	Year 1 target
Orientation signups	TBD — founders
Paid consultations	TBD — founders
Applications submitted	TBD — founders
Acceptances	TBD — baseline reference: ~100/semester (Yacine's track record)
Visas granted	TBD — founders
Enrolled & registered	TBD — founders
Student satisfaction	TBD — founders

Metric	Year 1 target
Referral rate	<i>TBD — founders</i>
Revenue (commission + fees)	<i>TBD — after first university deals signed</i>

9. Immediate Next Steps (Start Here)

When branding and website work begins, start with these five items only:

1. **Co-founder + exit clarity** — equity, old company exit, transition plan (Phase 0.1–0.3c)
2. **Pick 2–3 target universities** and book meetings (Phase 0.6–0.7)
3. **Choose brand name + tagline** (Phase 2.1–2.2)
4. **Outline orientation module 1** with Yacine (Phase 4.1)
5. **Build website sitemap** on paper before any code (Phase 3.2)

Everything else in this document supports these five.

10. Document Changelog

Version	Date	Notes
1.0	July 2026	Initial strategy, competitive analysis, master to-do
1.1	July 2026	Corrected: one co-founded company; Yacine leaving old employer; transition risks added
1.2	July 2026	Yacine's merits (100/semester, audience) stay as company assets; his name = student-facing brand
1.3	July 2026	Removed unverified data (185K followers); added Verified Facts section; metrics → TBD

This document is the single source of truth for strategy. Branding, website, and marketing tasks should reference section numbers here.
